This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and small dark spots, possibly due to age or handling. The left edge of the page is bound, showing the stitching and the inner cover material. There is no text or other markings on the page.

[illegible]This image shows a blank page with some faint horizontal lines and scanning artifacts. There is no legible text or other graphical elements.

Figure 1 is a line graph showing the percentage of total protein in the supernatant versus the percentage of total protein in the pellet for various proteins. The y-axis is labeled 'PERCENTAGE OF TOTAL PROTEIN IN SUPERNATANT' and ranges from 0 to 100. The x-axis is labeled 'PERCENTAGE OF TOTAL PROTEIN IN PELLET' and ranges from 0 to 100. A diagonal line represents the identity line (y=x). Data points for various proteins are plotted, with some labeled with numbers 1 through 10. A legend indicates that open circles represent 'EXTRACTED' and filled circles represent 'RESIDUE'.
